This program provides selected undergraduate students from around the United States an opportunity to conduct ten weeks of summer research with some of the country’s leading physicists in a range of experimental physics fields. The program is from June 2 through August 8, 2014.

Past Projects Include

- The Higgs, Muons, and Resistive Plate Chambers
- Ultrafast two-photon transient absorption spectroscopy
- Network Theory and Galaxy Clusters
- Direct Detection of Dark Matter
- Quell Your Dreads: Quantum Dots Are Your Friends
- Imaging Current Induced Spin Polarization

Participants Receive

- $4,900 stipend, housing, and travel reimbursement
- MCard with Blue Bucks for food
- Access to university recreational facilities
- Access to world-class research facilities
- 1-on-1 instruction from internationally recognized faculty

Apply between December 1, 2013 and February 21, 2014 http://reu.physics.lsa.umich.edu/
