Opportunities are available for undergraduate students with interests in Physics or Astronomy to participate in NSF (REU) sponsored research at the University of Oklahoma. Students will be directly involved with ongoing research, working with faculty and students from OU, and actively participating in career preparation seminars.

REU Research offered in:
• Astronomy and Astrophysics
• Atomic, Molecular, & Chemical Physics
• High Energy Particle Physics
• Condensed Matter Physics
• Theoretical and Experimental Research Programs

Research facilities include Laser Cooling, Precision Measurement Labs, Atom Interferometry, STM Lab, Molecular Beam Epitaxy Facility, Particle Detector Development Lab and Clean Room, High Magnetic Field Lab, and High Performance Computing Facilities.

The program runs from May 30-July 29, 2017. A stipend of $4500, travel expenses, and housing in university apartments will be provided.

Applications received by February 5, 2017 will be considered in full. Late applications may be considered as space permits.
